INFORMED CONSENT

There are certain complications that can occur as a result of a spinal manipulation. These compilations include, but are not limited to: muscle strain, cervical myelopathy, disc and vertebral injury, fractures, strains and dislocations, Bernard-Horner's Syndrome (also known as oculosympathethetic palsy), costovertebral strains and separation. Rare complications include, but are not limited to stroke. The most common complication or complaint following spinal manipulation is an ache or stiffness at the site of adjustment.

The doctors are aware of these complications, and in order to minimize their occurrence will take precautions. These precautions include, but are not limited to my taking a detailed clinical history and examining you for any defect which would cause a complication. This examination may include the use of x-rays. The use of x-ray equipment may pose a risk if you are pregnant. If you are pregnant, you should let us know when we take your clinical history.
